### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The claim is allowable because the prior art fails to teach a magnet bases being rotatably supported at one ends to a ruler body and having magnets affixed to lower surfaces of the magnet bases, a magnet base rotating means for rotating the magnet bases in a direction to tilt upward relative to the surface plate, and attracting means for releasing the magnet base rotating means for tilting the magnet bases downward causing the magnets to be attracted to the surface plate as set forth in claim 1.

Kennedy teaches a paper ruler 11, a surface 13, a cutter 15, a magnet (54 and 35), an attraction and attraction release buttons (47 and 60) and an upper surface 27. Kennedy's magnets are directly connected to the body contrary to the invention that the magnets are supported by the magnet base, which rotates. In addition, Kennedy fails to teach the magnet base rotating means for rotating the magnet bases in a direction to tilt upward relative to the surface plate and attracting means for releasing the magnet base rotating means for tilting the magnet bases downward as set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
